East Tennessee Materials & Energy Corporation (M&EC), a Perma-Fix Environmental Services company, will conduct a Demonstration Test to determine operational parameters for its thermal desorption system beginning the week of December 8, 2014. The facility (EPA ID number TNR000005397) is located in Roane County at the East Tennessee Technology Park in Oak Ridge, Tennessee 37830. The Demonstration Test Plan (DTP) has been approved by the Tennessee Department of Environment and Conservation (TDEC) Division of Solid Waste Management (DSWM), in cooperation with the United States Environmental Protection Agency (EPA).

The M&EC waste storage and treatment facility's operations are regulated under TDEC Resource Conservation and Recovery Act (RCRA) Part B Permit no. The radioactive and low level mixed wastes managed by the facility are accepted from government (e.g., U.S. Department of Energy) and commercial generators (e.g., nuclear power utilities) for permitted storage and treatment (e.g., separation, extraction, stabilization, or immobilization) of restricted constituents. TSCA regulated wastes containing PCBs at concentrations above 50 ppmw will be subject to similar treatment and/or land disposed according to the specific PCB waste classification and disposal facility acceptance criteria.
